

# ***Flying Saucer Was Probably Jet Plane***

**Lithgow residents were again startled this morning by the appearance in the sky of a silver object which was seen on Wednesday and reported yesterday as a flying saucer.**

**On Wednesday, members of the Lithgow Small Arms Rifle Club brought telescopes to bear on the object, which was this morning described by a member as a "twin fuselage plane, silver in color and resembling a Lockheed Lightning."**

**A housewife who saw the object when it passed over Lithgow this morning, said she was hanging out clothes when she noticed the object from the yard of her residence in Wright's-road.**

**"It appeared to come from behind the State Mine and disappeared in the direction of the rifle range," our informant said, adding that she heard a "whistling noise like a rocket." The object, she added, left behind a stream of vapor which remained in the sky for some time.**

**It was suggested this morning that it was a jet plane, possibly a Vampire.**
