

## Flying Saucer Over Cessnock

A young man claimed this morning that he had seen a flying saucer over Cessnock at about midnight last night.

He is Bill Croisdale, of Foster-street, Cessnock.

Bill said he was standing on the back verandah of his home when he first saw the "saucer" high up in the sky in the vicinity of Nulkaba.

"It seemed to be hovering well up in the sky and then came down within a few hundred feet of the ground," he said.

"It moved from side to side and appeared to be spinning, and then moved up and came down again."

Bill said the "saucer" appeared to be of different hues of green and blue, with a red tinge.

It eventually rose to a great height and disappeared.

Bill said his mother also saw the "Saucer," and a neighbour had told him she saw it a few night's before.
