

FLASH WAS NO FLYING SAUCER

Melbourne, Sat: While **Bruce Burnett**, of **Breakwater**, near **Geelong**, was fishing in the **Barwon River** with his young son last night, a fireball flashed overhead with a screaming noise and plunged into the river.

Burnett said today that steam rose 25ft. from the water and waves passed along the river. He said the object looked like a big ball, 18 inches across, with a long bluish tail. He said he believed the object was a meteorite, but is certain it wasn't a flying saucer.
