U.S. Flying Saucer Scare Now Official

WASHINGTON, Friday (A.A.P.).—

Airforce field commanders have been alerted to report "unconventional aerial objects" after the sighting of objects which the Airforce admits cannot be explained away by the usual weather balloon and natural phenomena evaluation of flying saucer reports.

Persons sighting "unusual aerial manifestations" have been asked to submit reports to the nearest air base.

The airforce has acted following the receipt of reports of unidentifiable objects popularly known as flying saucers.
