

Seeing "saucers" again

TUCSON (Arizona)—The U.S. Air Force yesterday had a new "flying saucer" report to worry about. At least four men stationed at an air force base near Tucson on Thursday reported seeing a strange oval-shaped object in the air.

A civilian flight commander, Chick Logan, described the object as five or six times as large as a Superfortress bomber.

"It was not like a saucer, but more oblong," Logan said. "I flew as high as I could to 14,000 and it appeared to be at least 40,000 feet higher than that.

"It was real bright and shone like polished aluminium. I tell you, I have been flying for 25 years now, and I have never seen anything like

it."

The Air Force had announced on Thursday that it had alerted field commands to report on "unconventional aerial objects."

It had done this, the Air Force said, because there had been a number of sightings of "unusual aerial manifestations" that could not be explained.
