

NEW FLYING SAUCER SEEN

TUCSON (Arizona), April 4 (A.A.P.): The United States Air Force today had a new flying saucer report to worry about.

At least four men stationed at an air force base near Tucson yesterday reported having seen a strange oval-shaped object in the air.

A civilian flight commander, Chick Logan, described the object as five or six times as large as a Superfortress bomber.

"It was not like a saucer, but more oblong," Logan said.

"I flew as high as I could to 14,000 ft. and it appeared to be at least 40,000 ft. higher than that.

"It was real bright and shone like polished aluminium.

"I tell you, I have been flying for 25 years now, and

I have never seen anything like it."

The Air Force had announced yesterday that it had alerted field commands to report on unconventional aerial objects.

It had done this, the Air

It had done this, the Air Force said, because there had been a number of sightings of unusual aerial manifestations that could not be explained.
