

Flying Saucers Reappear

U.S. AIR FORCE WORRIED

Tucson (Arizona), April 4.—The United States Air Force to-day had a new "flying saucer" report to worry about. At least four men stationed at an air force base near Tucson yesterday reported seeing a strange oval-shaped object in the air. A civilian flight commander, Chick Logan, described the object as five or six times as large as a Superfortress bomber.

"It was not like a saucer but more oblong," Logan said. "I flew as high as I could—to 14,000 ft.—and it appeared to be at least 40,000 ft. higher than that. I have been flying for 25 years now and I have never seen anything like it."

The air force had announced yesterday that it had asked field commands to report on "unconventional aerial objects." It had on this because there had been a number of sightings of "unusual aerial manifestations that could not be explained."
