

# Report of Huge "Flying Saucer"

**NEW YORK, April 4 (A.A.P.). — The United States air force today had a new "flying saucer" report to worry about.**

At least four men stationed at an Air Force base near Tucson (Arizona) yesterday reported seeing a strange oval-shaped object in the air.

A civilian flight commander, Chick Logan, described the object as five or six times as large as a Super Fortress bomber.

"It was not like a saucer, but more oblong," Logan said. "I flew as high as I could, to 14,000 feet and it appeared to be at least 40,000 feet higher than that.

"It was bright and shone like polished aluminium. I'll tell you, I have been flying for 25 years now, and I have never seen anything like it."

The Air Force had announced yesterday it had alerted field commands to report on "unconventional

report on "unconventional aerial objects."

It had done this, the Air

Force said, because there had been a number of sightings of "unusual aerial manifestations" that could not be explained.
