

# **New Flying Saucer In U.S. Reopens Controversy**

Australian Associated Press

**TUCSON (Arizona), Fri.**—The United States Air Force today had a new "flying saucer" report to worry about.

At least four men stationed at an Air Force base near Tucson yesterday reported seeing a strange oval-shaped object in the air.

Chick Logan, a civilian flight commander, described the object as five or six times as large as a Superfortress bomber.

"It was like a saucer, but more oblong," Logan said.

"I flew as high as I could to 14,000ft., and it appeared to be at least 40,000ft. higher than that.

"It was real bright and shone like polished aluminium.

I'll tell you, I have been flying for 25 years now, and I've never seen anything like it," Logan said.

The Air Force had announced yesterday that it had alerted

field commands to report on  
"unconventional aerial objects."

It had done this because there  
had been a number of sightings  
of "unusual aerial manifesta-  
tions" which could not be ex-  
plained.
