

## FLYING SAUCER SEEN IN NEW ZEALAND

WELLINGTON, April 28. — A report of a flying saucer over New Zealand came to-day from a North Auckland farmer, J. Erceg, of Kokopu, 13 miles west of Whangarei, who claims to have seen an oval boat-shaped object travelling across the sky at 10.35 p.m. on Saturday. Erceg said the object was bright blue and seemed about ten to twelve feet long. It travelled across the night sky, "slower than a meteor but faster than a plane." The saucer travelled from north to south. Erceg claims to have seen it while he was returning with his family from an evening at the pictures.
