

## Flying Saucer Over N.Z. Now

WELLINGTON, April 28.—A report of a "flying saucer" over New Zealand came to-day from a North Auckland farmer, J. Erceg, of Kokopu, 13 miles west of Whangarei.

He claims that he saw an oval, boat-shaped object travelling across the sky at 10.35 p.m. on Saturday.

Erceg said the object was bright blue and seemed about 10 to 12 feet long. It travelled across the night sky, from north to south, "slower than a meteor but faster than a plane."

Erceg claims to have seen it while he was returning with his family from an evening at the pictures.
