

"BIGGER THAN SKYMASTER"

Said They Saw Flying Saucer

Sydney, Sat: A flying-saucer report which appears to outdo all other flying-saucer reports came today when 3 GPO employes claimed to have sighted a mysterious flying object over Sydney.

According to their story the object was 3 or 4 times the size of a Skymaster and nothing like an ordinary aircraft.

They said in shape it was something like an airship or submarine and "lit up like a liner at sea."

They estimated it sped over Sydney 30,000ft. up at between 400 and 500 m.p.h.

Trio, mail sorter Bill Anderson, and mail collectors R. Edwards and Ken Striple, said they saw the object as they left Enfield post office at 6.30 a.m.

They watched it until it vanished. It made no noise.
