

MORE REPORTS OF "FLYING SAUCERS"

SYDNEY, Sunday.

Fresh reports reached Sydney to-day of mysterious "flying saucers" seen over the South Coast and northern Victoria yesterday.

One report, from a young motor cyclist, near Nowra, described the "saucer" as a bright, glittering object shaped like a cigar.

The other, from Benalla, northern Victoria, was seen by an interstate truck driver and his wife at 3 a.m. yesterday.

The driver said the object had rows of lights on either side, and was travelling at high speed.

Eleven persons yesterday reported seeing similar objects in Sydney, Berowra and Parkes.

All of them saw the "saucers" after 6 a.m.

All reports described the object as cigar-shaped, much larger than a normal aircraft and leaving a blue trail.

Air Force authorities, civil aviation and meteorologists have been unable to give an explanation of the reports.
