

## Flying Saucer Explanations

Canberra, May 6. — Mr. Casey today advanced three explanations for the appearance of what are known as flying saucers over parts of Australia. He said they were either a very vivid imagination on the part of those who reported seeing them, possible meteors or the sun shining on the aluminium fuselage of aircraft.

"There is no possibility of them being any secret weapon or any experiments being conducted by the C.S.I.R.O.," said Mr. Casey.
