

"FLYING OBJECTS"

SIGHTED IN AUSTRALIA.

SYDNEY, May 6.—The Australian Minister for External Affairs (Mr. R. G. Casey) said to-day that there is no chance that the mysterious flying objects sighted in Australia and elsewhere are new secret weapons.

Mr. Casey thinks that the people who reported the objects really saw either a meteor, the sun shining on a high flying aircraft or a weather balloon.

To-day a new crop of reports has come in about a flying object travelling fast over Sydney. The object has been described as being long and silver-coloured and travelling noiselessly.
