

Flying Objects Not "Secret Weapon"

SYDNEY, May 6.—The Australian Minister for External Affairs (Mr. Casey) said today that there was no chance that the mysterious flying objects sighted in Australia and elsewhere were a new secret weapon.

Mr. Casey thinks that the people who reported the objects really saw either a meteor, the sun shining on a high flying aircraft, or a weather balloon.

Today, a new crop of reports have come in about a flying object travelling fast over Sydney. The object has been described as being long and silver coloured, and travelling noiselessly.
