

## **Flying Objects Not Secret Weapons**

SYDNEY, May 6.—The Minister for External Affairs, Mr. R. G. Casey, said to-day there was no chance that the mysterious flying objects sighted in Australia and elsewhere were a new secret weapon.

Mr. Casey thinks the people who reported the objects really saw either a meteor, the sun shining on a high-flying aircraft or a weather balloon.

To-day a new crop of reports have come in about a flying object travelling fast over Sydney. The object has been described as being long and silver-coloured and travelling noiselessly.
