

MORE EVIDENCE OF "FLYING SAUCER"

Another Echucaite confirms reports that a "flying saucer" was visible from here on Saturday morning, and being a railwayman he fixed the time exactly 6.10 a.m.

This coincides with the time given by a railway guard at Benalla and by two New Australians at Echuca who saw the same object.

The Echuca railwayman, Mr Bruce Peat, says the meteor, or whatever it was, hurtled across the sky towards the east giving out a brilliant light and shedding itself as it moved out of sight.
