

"Flying saucer" comes to rest

THE ROUND HOUSE
with panoramic view
from every room, will
soon rise from a site at
Oliver's Hill, Frankston.

Architect Roy Grounds
says the plan is well
suited to the hilltop
"free-standing" site, his
client's needs, and will
use every inch of space.

The plan is a circle
22ft. 6in. in diameter. It
comprises a living room,
four bedrooms, two bath-
rooms, kitchen and sun-
room on one floor, with
a carport and large stor-
age space below.

Members of one of
Victoria's oldest families
— the Hentys — will
occupy the house.
