

## **Canadians See Flying Saucer**

**BROCKVILLE, Ontario, Wed. (A.A.P.). — Observers said here yesterday that they had seen a flying saucer "like a floating light-bulb" over the city last night, at about 5,000 feet.**

**They said it moved in a north-westerly direction and stayed in view for about half an hour. As it disappeared from sight, they said, it was joined by a second small light.**
