

LATEST U.S. FLYING SAUCER REPORTS

MIAMI (Florida), July 17. Two airline pilots, flying in the same air liner, said today that they had seen eight large flying saucers at supersonic speed near Norfolk, Virginia.

Mr. W. B. Nash and Mr. W. H. Fortenberry of Pan-American Airways, said the "flowing orange red saucers" manoeuvred at a speed of "far above 1000 miles an hour."

The two men said that at first six of the saucers appeared about 6000 feet below them. They flew in an echelon formation at about 2000 feet, then, as the plane passed over them, they turned sharply and were joined by two other saucers.

The eight saucers zoomed upwards to about 10,000 feet and vanished in about 10 or 12 seconds.

The two pilots said that the saucers were about 100 feet in diameter and between 10 and 15 feet thick.

"As they neared us they appeared to be solid bodies of light, but they had definite outlines," said Mr. Nash.

He added that they manoeuvred too sharply for human endurance, saying, "whoever was in those things had capabilities far beyond our own. Those things absolutely did not contain human beings as we know them."

The two men reported seeing the saucers on a flight from Newport News, Virginia to Norfolk, on Monday night.
