

### **METEOR SEEN IN WEST**

People in the central west who on Monday night saw a strange light in the sky, ridiculed any suggestion of "flying saucers." A man travelling between Forbes and Parkes and a taxi driver at Dubbo, described it as a meteor. The traveller said at first the meteor frightened him. It showed many colors and appeared to fall in a paddock about eight miles from Parkes. The light showed for a while after it fell. The taxi driver said there was no doubt about it being a meteor. The phenomenon formed a big red tail, and burst into a brilliant flash of blue light before it disappeared. The strange light was also reported at Trangie.
