

N.Z. "FLYING SAUCER"

LIKE PARTIAL FOOTBALL

WELLINGTON, July 23 (A.A.P.).—The New Zealand model of a "flying saucer," shaped like a Rugby football with the end cut away, according to one observer, was seen over Hamilton in the centre of the Waikato district shortly after 9 p.m. on Sunday. The object was seen by a number of witnesses, including a Baptist minister (Rev. P. H. Carter), who said it was a solid, bright object, followed by a stream of bright vapour and sparks. It was steady in its course and could not have been a rocket. It was nothing like a meteor.

A woman, who saw the object from a window, said it flashed parallel with the horizon across the sky at a tremendous speed.
