

Officially, There Are No Flying Saucers

WASHINGTON, Tues (AAP): The U.S. was confident that there was no danger from "flying saucers" or other mystery aerial

objects, the American Air Force announced today.

Air Force Intelligence Director Major-General John Samford told a news conference: "Six-year analysis of mysterious object sightings has revealed no pattern which shows anything remotely consistent with any menace to the U.S."

Between 1000 and 2000 reports had been studied by Air Force investigators and less than 20 per cent of the reported aerial objects remained unidentified, he said.
