

## FLYING SAUCER REPORT

Recently folk from all around N.S.W. reported seeing what was thought to be a flying saucer. At the same time young Donald Watson saw what he described as a fiery disc in the sky, at 7.45 p.m., on the same Monday night.

Don lives at Wentworth Falls, and called his parents, Mr. and Mrs. J. Watson, to come quickly and see the flying saucer. They, of course, didn't really feel he was "seeing something," until they heard reports of the incident over the "air"; then realised Don had glimpsed the phenomenon at the same time that night.
