

Flying Saucer Week

***New York, Monday.—
Flying saucers will be re-
ported "in great numbers"
this week if the weather
is good, Mr. Robert Coles
curator of the Hayden
Planetarium in New York.
said.***

**He said the reports would
be based on sightings of the
annual celestial display of
perseid meteors, beginning
tonight.**

**The meteors would be
visible in the night skies
until next Wednesday as a
fiery shower of brilliant
particles that seemed to
originate in the constella-
tion Perseus. "The Cham-
pion," Mr. Coles said.**

**He added that most of
the particles making up
the shower were believed to
be quite small.**
