

"Mystery" Object

A "mystery" object in the western sky intrigued many employees of Walkers Ltd. yesterday afternoon. It was seen about 3 o'clock and one who saw it was able to offer a explanation. It was described as a silvery-looking object, but had no connection with any ordinary plane. It was said to be travelling at a fast rate of speed, ten feet per second. The sky was clear, and for these reasons those who saw it are still puzzled by its appearance.
