

Another "Flying Saucer"

THREE persons saw what they described as as flying saucer over Hobart on Tuesday evening.

They are Mr. V. W. Taylor, Bayswater Rd., Moonah, and his daughters, Myra and Fay.

Mr. Taylor and Myra called at "The Mercury" office yesterday, and both said they saw an oblong object high in the sky.

It was of a gold or orange colour, and moved rapidly from the south-east in a northerly direction.

The time was between 5 p.m. and 5.30 p.m., and the object was in view for a quarter of an hour.

They looked through binoculars, and saw it more clearly. It appeared to have a light at the rear.
