

## **MINERS SEE A "SAUCER"**

**Perth, Wednesday**

Several members of the staff of Norseman Goldmines claimed today that they had seen a flying saucer over Norseman.

Mr. W. Long, a geologist, said that the object—round, silvery, and very much like a saucer — was travelling slowly in an easterly direction, north of the town.

He was about to put a telescope on it when it disappeared behind a high cloud.
