

Mysterious Objects Over City

Two Rockhampton women claim to have seen what they consider might have been a flying saucer. Matron E. Lane, CWA Hostel, who was a war-time spotter, and her assistant, Mrs J. Day, while hosing the garden the other day, saw something mysterious coming from the north and flying slowly in a south-easterly direction about 9.45 a.m.

The object was very high and appeared as a big aluminium ball with a definite tail. It appeared to be almost still when observed, but it slowly moved out of sight in 20 minutes. When the sun shone on it at different angles it glistened.

The attention of a guest at the hostel was drawn to the object, and Mrs Lane also spoke to a man later in the day, who said he saw it, and intended to report the matter to the police.
