

A Flying Saucer

WHO SAW IT?

It was reported to the Mail on Thursday morning by Mrs. D. H. Beard, of Woodlands Road, near Berrima, that while sitting on her verandah about 10.45 a.m. she saw an object in the sky which answered the description of a flying saucer. It travelled at about the same speed as an aeroplane but made no noise. It appeared in the south-east and travelled to the north, finally disappearing into a cloud. The object appeared to be the size of a penny, was circular in shape and appeared to shine. As it got further away this shiny appearance faded.

Mrs. Beard is emphatic that the flying saucer was not imagined and the Mail would welcome reports from other residents.
