

"FLYING SAUCER" OVER BRITAIN

R.A.F. EXPERTS STUDY REPORTS.

LONDON, Sept. 21 (A.A.P.).—Royal Air Force experts to-day studied the reports from 10 experienced officers and men who have described with almost identical details the appearance and behaviour of a "flying saucer" over a North of England aerodrome yesterday.

This is the second time within a week that European observers familiar with aerial objects announced the sighting of "saucers."

In Central Sweden last Saturday an ex-Air Force flyer, Tute Innala, watched a "snow-plough shaped cloud with bubbling smoke from its tail" appear very high and streak across the sky at a terrific speed. It dropped a "blue-green shimmering plate which changed its course and disappeared equally as fast in the opposite direction." His wife supported his testimony.
