

## **FLYING OBJECTS COMING FROM BEYOND THE EARTH**

**NEW YORK, Sunday.**

The United States Air Force has a "breath-taking" report, expressing belief that some mysterious flying objects seen on earth originate from "sources outside this planet," reports Robert S. Allen, Washington correspondent of the "New York Post."

He said the report, by "noted American scientists and Air Force officials," was based on 1,800 flying saucer observations in the past five years.

Air Force authorities were considering publication of certain portions of the report, he declared.

"Chiefly deterring them is fear that the sensational findings may cause undue public alarm," Allen asserted. "These findings were described by a high air force official as 'fantastic, but true'."

The correspondent said that the document contained two other findings:—

1. In some instances flying objects that have been sighted were actually secret U.S. missiles undergoing tests.

2. The Soviet Union was profoundly mystified and worried by "flying saucers," and strongly suspected they were a new American weapon. The report said that the Kremlin had four different investigations under way to discover the identity and source

ent investigations under way to discover the identity and source of the devices.

Allen said that "One important point stressed in the report is that most authoritative and detailed sightings came from atomic plants, military bases and research centres.

"The study is the work of the Air Technical Intelligence Centre Wright Patterson Air Base, Dayton, Ohio. Top scientists are devoting their full time there, analysing reports on flying objects.

"Their activities are so secret that the Air Force will not permit publication of their names. In fact, no one connected with the project or the report would permit his name to be used."
