

KITE WITH RED LIGHT

TOWNSVILLE'S "FLYING SAUCER."

TOWNSVILLE. Sept. 29.—
Townsville's first "flying saucer" report was solved to-day when it was explained that several boys had been flying a kite, fitted with a light, on Sunday night. A number of people had seen the mysterious red light as it flew over a section of the town.

Inquiries made to the R.A.A.F., D.C.A., Townsville meteorological station and south-bound aircraft, which were alerted, failed to solve the mystery.
