

## **"FLYING SAUCER" MYSTERY SOLVED**

Townsville's first "flying saucer" report on Sunday night was answered yesterday when it was disclosed that the object seen in the sky was a kite fitted up with a torch.

A number of people had seen the 'mysterious red light' as it flew over Railway Estate, but inquiries made to the R.A.A.F., D.C.A., the Townsville Meteorological Station, and a south-bound aircraft which was alerted, failed to solve the 'mystery.'

This was Townsville's first 'saucer' report.

The puzzle was solved when it was explained that several boys had been flying a kite fitted with a light in the vicinity of Stanley Street.
