

## Flying Saucer Seen

AUCKLAND, Sept. 30.—A claim that they saw a flying saucer was made to-day by a reputable Auckland and his wife. Like a large aeroplane 10,000 feet high it flew southwards from horizon to horizon, disappearing in about six seconds. "It was an elongated form of cigar or tubular shape showing on the visible side six or eight lights," he said. The man added: "There was no sound other than the barely audible 'woosh.'" The saucer was seen at 11 p.m. on September 27.
