

“Cigar-like Flying Saucer” Seen in N.Z.

AUCKLAND, Tuesday
(A.A.P.-Reuter). — An Auckland couple claimed to-day that they had seen a “flying saucer” which was “an interplanetary conveyance of a type entirely unknown to us.”

They said it was like a large cigar with six or eight greenish-blue lights along the side.

It flew south, disappearing in about six seconds.

The man said there was no sound other than a barely audible “whoosh.”

The man would not give his name “because he might be ridiculed.”
