

ANOTHER STRANGE LIGHT

A North Ward resident yesterday claimed he had seen a strange, light, yellow in colour "flying" over the crest of Castle Hill on Monday night.

Mr. T. Dunn, of Mitchell Street, North Ward, said his wife who was on the front steps of his house had first noticed the light and had called to him.

Mr. Dunn said that the strange light, which was very high up, came into view over Castle Hill. It was travelling at a fast rate and he saw it only for about four seconds.

"The object then disappeared out across the bay," he added.

From where he was standing, Mr. Dunn estimated that the object would be about two feet long. Attached to it was what appeared to be a short tail.

A mysterious light was reported in the Townsville area on Sunday night, but the mystery was later cleared up by information that it was a kite to which a torch was attached.

Mr. Dunn said yesterday that the way the object he saw was flying he did not think it was a kite.

"It was flying horizontally" he said.
