

Aucklanders Claim Seeing Flying Saucer

AUCKLAND (A.A.P.-Reuter): A claim they saw a flying saucer was made yesterday by a reputable Auckland-er and his wife.

Like a large aeroplane 10,000 ft. high, it flew southward from horizon to horizon, disappearing in about six seconds, they said.

"It was elongated in the form of a cigar, or tubular shape, showing on the visible side six or eight lights," he said.

The man added: "There was no sound other than barely audible 'woosh.'"

The saucer was seen at 1 p.m. on September 27.
