

## **ANOTHER FLYING SAUCER CLAIM**

**AUCKLAND, September 30 (AAP-Reuter).—** A claim that they saw a flying saucer was made today by a reputable Aucklander and his wife.

Like a large aeroplane, 10,000 ft high, it flew southward from horizon to horizon, disappearing in about six seconds, they said.

"It was an elongated form of cigar or tubular shape, showing on the visible side six or eight lights," the Aucklander said. He added: "There was no sound other than the barely audible "woosh."

The saucer was seen at 11 p.m. on September 27.
