

# ***N.Z. Move To Solve Mystery Of Saucers***

**AUCKLAND, Wednesday (A.A.P.-Reuter).—**  
An organisation called Civilian Saucer Investigation (New Zealand) has been formed in Auckland to prove or disprove the flying saucer mystery.

The organisation is not connected with the Government or with the Armed Forces.

It has been formed because of its members' thirst for knowledge and their desire to

consider worldwide explanations offered to account for "flying saucers."

The committee includes astronomers, scientists, and aviators.

It is believed one of New Zealand's leading atomic energy experts will join the investigations.

The organisation promises a sincere investigation of all reports, which will be treated as confidential.

The committee will correspond and affiliate with kindred bodies overseas.
