

RADIO LEG-PULL OVER SAUCERS

WELLINGTON, N. J. (A.A.P.-Reuter): An announcer over commercial radio station 3ZB, Christchurch, told listeners early yesterday morning that a flying saucer had been seen over the city the previous night and that an unidentified object that crash landed in a mid-city park was being studied by scientists.

Many people went to the park

The station manager later said the announcer was trying to be humorous.

"It is beyond me to explain why he thought a faked news flash was funny or even entertaining," he said. "It won't happen again."
