

# Radio Man Puts Out The "Saucer"

Wellington. — Commercial radio station 3ZB (Christchurch) told listeners that early a "flying saucer" had been seen over the city.

The announcer added that an unidentified object had crash-landed in a city park, killing a horse, and was being studied by scientists.

"The reports are unconfirmed," he said.

Visitors to the park could not find the object or the dead horse.

The station manager later said the announcer was trying to be humorous.

It's beyond me to explain why he thought faked news flashes funny or even entertaining," the manager said.

"It won't happen again."
