FRENCH REPORT

PARIS, Wednesday: White circular objects surrounding something like a giant flying saucer were reported by about 20 persons at Gaillac in Southern France yesterday.

They said that as soon as the objects passed overhead they let fall a string of bright white threads which looked like glass wool but which melted away as soon as they were touched.

A police officer said that two of his men reported picking up the thread-like substance but that it melted.

Observers said the objects, slightly swollen at the centre, spun across the sky in formation of two. They were over the area nearly half an hour. On October 17 a dozen residents of Imoron, in the lower Pyrenees, reported they saw flying saucers surrounding a long cigar-shaped object flying in clear sky at about 6000 feet.
