

"SAUCER" SEEN AT BENDIGO

MELBOURNE, Monday: A flying saucer is reported to have been sighted over Bendigo at 6.30 a.m. today.

Mr. Ken Torpy, of Hallam Street, Bendigo, said he heard motors "like ten jet planes," and looked up and saw a silver disc spinning slowly against a clear blue sky. It then rose and travelled in a northerly direction.

He rushed inside after observing the disc for about a minute, but when he returned with his wife it could no longer be seen, although the noise could be heard by both of them.
