

Flying Saucer Seen Over Bendigo

MELBOURNE, Mon.—A flying saucer is reported to have been sighted over Bendigo at 6.30 a.m. to-day.

Mr. Ken Torpy, of Hallam street, Bendigo, said he

heard motors "like 10 jet planes," and looked up and saw a silver disc spinning slowly against a clear blue sky. It then rose and travelled in a northerly direction.

He rushed inside after observing the disc for about a minute, but when he returned with his wife it could no longer be seen, although the noise could be heard by he and his wife.
