

Flying Saucer Claim From Bendigo

MELBOURNE, Mon.— A flying saucer is reported to have been sighted over Bendigo at 6.30 a.m. today.

Mr. Ken Torpy, of Hallam Street, Bendigo, said he heard motors "like 10 jet planes" and looked up and saw "a silver disc spinning slowly against a clear blue sky."

It then rose and travelled in a northerly direction.

He rushed inside after observing the disc for about a minute, but when he returned with his wife it could no longer be seen, although the noise could be heard by both him and his wife.
