

FLYING SAUCER AT BENDIGO

MELBOURNE, Dec. 15. — A flying saucer is reported to have been sighted over Bendigo at 6.30 a.m. to-day. Mr. Ken Tropy, of Bendigo, said that he heard motors "like 10 jet planes" and looked up. He saw a silver disc spinning slowly against a clear blue sky. It then rose and travelled in a northerly direction. He rushed inside after observing the disc for about a minute, but when he returned with his wife it could no longer be seen, although both he and his wife could still hear the noise.
