

## **NOISY SAUCER SEEN**

**MELBOURN5.** Monday.

A "flying saucer" is reported to have been sighted over Bendigo at 6.30 a.m. to-day.

Mr. Ken Torpy, of Hallam Street, Bendigo, said he heard motors "like ten jet planes" and looked up and saw a silver disc spinning slowly against a clear blue sky. It then rose and travelled in a northerly direction.

He rushed inside after observing the disc for about a minute, but when he returned with his wife it could no longer be seen, although the noise could still be heard.
