

FLYING SAUCER OVER BENDIGO?

MELBOURNE, December 15.
—A flying saucer is reported to have been sighted over Bendigo at 6.30 a.m. today.

Mr Ken Torpy, of Bendigo, said he heard motors "like 10 jet planes" and looked up. He saw a silver disc spinning slowly against a clear blue sky. It then rose and travelled in a northerly direction. He rushed inside after observing the disc for about a minute, but when he returned with his wife it could no longer be seen, although both he and his wife could still hear the noise.
